## **SEMY ENGINEERING & CONSULTING GMBH**

SEMY Engineering & Consulting GmbH was foundedv in 2020 and is active in various industries. In addition to services, SEMY also offers various standard products for B2B and B2C. Custom-made products and systems are also possible with us.

Since the beginning of 2023, we have also been supplying cabinet and enclosure systems. Our enclosure systems can be used in various industries such as electrical engineering, control panel construction, e-mobility, the IT sector, and many others.

We can equip and manufacture the cabinets accordingto your requirements. We can also design and manufacture custom-made solutions.

Customer designs are also checked for feasibility and manufactured by us. Please contact us if we have sparked your interest, and as specialists, we offer you our free consultation.

#### Force-X Series Server and Network Cabinets;

Force-Xs server represents perforated cover and Force-Xn network glass cover products. Force-X series are the most suitable products hat meet your expectations with its strong aesthetic structure that provides maximum ventilation for your server storage and other applications.

In addition, with its heavy-duty construction structure, it allows your heavy server equipment to be hosted. With its professional structure and aesthetic appearance, it is a highly suitable design that is thought to meet the needs of customers in your Data Center applications and fulfills data center criteria.

## FORCE-XS SERVER STANDARD CONFIGURATION

- $\cdot$  75% perforated front door with mechanism with handle and lock
- $\cdot$  Front cover with lever lock
- · Latch-lock back cover
- · Side covers with latch
- · 4 pieces of heavy type 19" device props with depth adjustment
- · 4 adjustable pinion feet
- · 55x25 2 wheel modules with 2 brakes and 2 without brakes (standard)
- . In 600mm wide cabinets, there are 2 cable entries in total, 1 on the lower chassis and 1 on the upper side, 3 pieces on the lower chassis and 3 pieces on the upper side in 800mm wide cabinets. A total of 6 cable passages were provided.

## FORCE-XN STANDARD CONFIGURATION

- · Aluminum and metal framed glass front door
- · Colorful decorative frame lath
- · Front cover with lever lock
- · Latch-lock back cover
- · 4 pieces of heavy type 19" device props with depth adjustment
- . 4 adjustable pinion feet

Force-x series server rack cabinet system is designed and manufactured for demanding data center environments. It is designed to accommodate all 19" devices and servers produced by major brands such as HP, Dell, Sun, Cisco, Juniper, IBM, Compaq.

## TECHNICAL INFORMATION

- · Material: Steel sheet
- · Width: W= 600, 800 mm
- · Height: 11 different U heights; 12'U 47U
- · Depth: D= 600, 800, 1000 mm
- · Color options: RAL 9005 black or RAL 7035 light gray
- . Lockable and removable side panels for easy transportation
- · Glass front cover, standard lockable metal back panel (see product catalog for other options)
- $\cdot$  Powerful Dynamic design
- · Extra productive space
- · Adjustable Front and rear device mounting brackets
- $\cdot$  Ease of installation

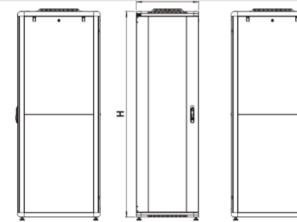

Force-x series, with rich features optimized for easy installation, cable organization, power distribution integration and airflow maximization, is a multifunctional cabinet shaped by customer feedback from all over the world. It is designed to meet the needs of current IT market trends and applications, from high-density computing and networking to broadcasting and audio-video. By focusing on cooling, power distribution, cable management and environmental monitoring, the Force-x series provides reliable environments for mission critical equipment.

## FREE STANDING TYPE CABINET GENERAL FEATURES

Lin-x series cabinets are a low-cost network and server cabinet system designed for network and server, meeting high-density cabling needs. With its modular structure, it is a good option for more storage, less transportation and practical assembly for your cost plans. Offers advanced fiber and copper cable management options; Provides maximum cable capacity for your high-density cabling requirements while simplifying cable installation, maintenance, and easy intervention.

## LIN-XN STANDARD CONFIGURATION

- · Aluminum or Metal framed glass front door
- · Colorful decorative frame lath
- · Locked front cover with handle
- · Latch-lock back cover
- · Clatch side covers
- · 4 pieces of heavy-duty 19" device props with depth adjustment
- · 4 pieces of adjustable pinion feet
- In 600mm wide cabinets, there are 2 cable entries in total, 1 on the lower chassis and 1 on the upper side,
  3 pieces on the lower chassis and 3 pieces on the upper side in 800mm wide cabinets. A total of 6 cable passages are provided.

Lin-x 19" Lin-x Free Standing cabinets, with a carrying capacity of up to 1000 kg, are an ideal solution for providing data distribution in infrastructure cable installations, protecting server devices at a basic level, and dense cabling management. A wide range of cable management accessories are available to provide perfect management for 19" devices. Flatpack option saves up to 60% on transportation cost and warehouse space.

## LIN-XS SERVER SERIES STANDARD CONFIGURATION

- $\cdot$  75% perforated flat front cover with mechanism and lever lock
- · Locked front cover with handle
- · Latch-lock back cover
- · Latch-on side covers
- · 4 pieces of heavy type 19" device props with depth adjustment
- . 4 adjustable pinion feet
- $\cdot$  55x25 2 wheel modules with 2 brakes and 2 without brakes

In 800mm wide cabinets, 3 on the lower chassis and 3 on the upper side. A total of 6 cable passages were provided.

Lin-x series server rack cabinet system is designed and manufactured for demanding data center environments. such as HP, Dell, Sun, Cisco, Juniper, IBM, Compaq

It is designed to host all servers produced by major brands

## SMART-X SMART-X MICRO DATA CENTER

# SMART-X

## SMART-X MICRO DATA CENTER

Smart-x Micro DC Data Center solutions; Micro Data Centers, which stand out with their design and new technology; It stands out with its low cost, fast installation and energy efficiency. Mitra Cabinet Micro DC is the right and low cost product for your solutions.

## FEATURES OF THE SMART-X MICRO DATA CENTER

**Fast on-site installation:** Installation and use immediately upon delivery, thanks to the ready-to-use integrated product.

**Low Installation Cost:** It significantly reduces the initial investment cost compared to Traditional Data Centers.

**Increased Energy Efficiency:** Significantly reduces cooling and power operation costs **Adaptable System Structure:** It can be easily customized according to your cooling and power needs.

**Energy Saving:** You do not need to cool the entire IT room, only Micro DC cabinet cooling system with the same brand air conditioner

**Modular System:** Micro DC structure that can be added in line with the increase in Data Center needs.

Portable: Micro DC can be easily moved to different locations thanks to its castable feature.

Security: Keeps data of high importance in a secure environment. Increases data and hardware protection.

**Fire:** It guarantees 24/7 business continuity with integrated fire detection-extinguishing and environment monitoring (EMS) systems.

**Maintenance:** The possibility of minimizing data center maintenance labor and costs thanks to its compact structure. **Plug and play System:** Limited Operation Factory ready-to-install system with all components and tests.

**Standardization:** Standard solution for all your branches. It limits the risk of human errors and reduces operating and maintenance costs.

Reduces the need for IT Personnel: You do not need to have an IT specialist for each location.

Remote Access: Micro DC, Data Center can be remotely controlled wherever you are with IP infrastructure.

**Economical Solution for Small Business:** You do not have to worry about a complex Data Center design and installation work.

Carrying Capacity: The Smart-XDC Micro Data Center has a carrying capacity of 1500kg.

## SMART-X MICRO DATA CENTER USAGE AREAS

Small and Medium Enterprises (SMEs)

Branches of financial institutions (Banks, Agencies etc.)

Data centers that require Quick Setup

Branches of state institutions and organizations (Police, Army, Schools, Electricity, Water companies, etc.) Companies looking to connect to the cloud instead of investing in a large data center Telecommunication and GSM companies' headquarters and exchange offices Remote locations where data center specialists are not available

Manufacturing companies for automation control and IT services

Disaster and emergency prevention centers.

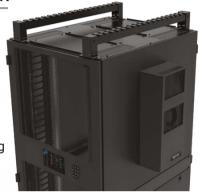

For mobile daily temporary locations

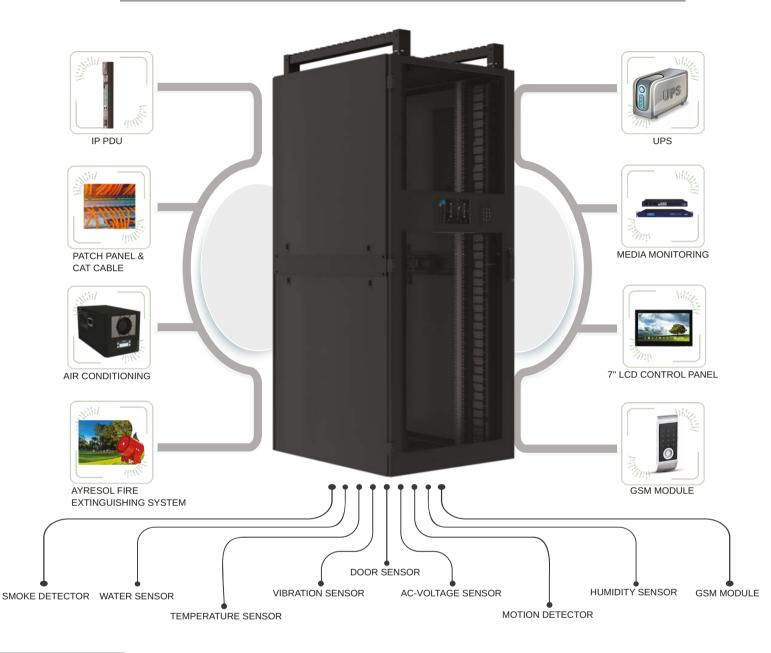

## SMART-X MICRO DATA CENTER

Smart-x Micro DC Data Center solutions, Rack Cabinet, front cover integrated digital 7" control screen UPS, product-specific cooling system, no installation gasless Aerosol fire detection and extinguishing system, IP-PDU (power distribution unit) electronic lock system. It is an integrated stand-alone data center solution that combines environmental monitoring systems (EMS) and environmental monitoring systems on a single platform.

With the remote monitoring feature, the data centers in the head offices and branches are monitored regardless of people, and the system is ensured to operate at the highest level with uninterrupted security.

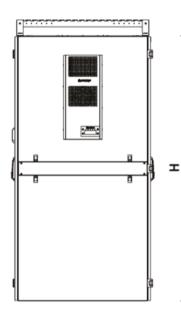

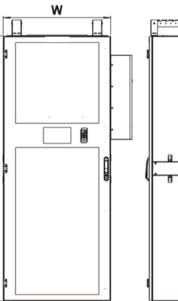

Smart-x Micro DC Data Center solutions; The initial installation cost significantly reduces costs when compared to data centers built with traditional methods (Construction works, raised floors, cable carriers, wall-mounted air conditioning systems and piping). It will enable current and future users to easily access the cloud system and benefit from the flexible and fully supported structure.

SO14001 2015

SO 45001 2018

CE

# WIN-BOX

#### WIN-BOX 19'' WALL TYPE CABINET

Win-Box series wall mounted cabinets are a product designed in the most ideal way, combining quality and aesthetics. It creates a price index to be onsidered thanks to its high performance in network applications and the quality it offers, the high-tech, fully automatic industrial infrastructure it is produced and its unique design.

Cable entry: Win-box series cabinets have upper chassis, rubberized edges and a sliding cable entry module. The cable entry module with dimensions of W:145mm x D:70mm ensures that the cables are taken into the cabinet in a healthy and safe manner. The rubber-edged cable entry mechanism has the opportunity to open 0-50mm. After the cables are taken into the cabinet, the sliding part is closed and fixed, the rubber edges are closed so as not to damage the cables, and at the same time, it keeps the entry of dust into the cabinet to a minimum.

**Ventilation:** Win-box series cabinets have decorative ventilation vents on the chassis, front, lower and upper arts. ventilation grilles Provides passive ventilation through convection (heat flow).

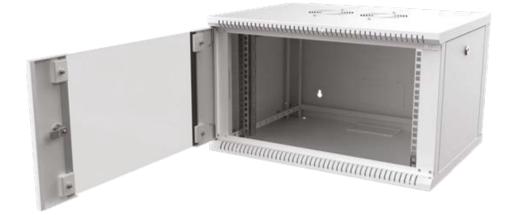

00

**Fan module:** Win-box series cabinets, Fan Modules for Wall Ready-to-install, plug and play style with on/off switches and plugs. Every Fan has an airflow. 2.3- 3 cbm/mincapacity. Fan Technical data: 18/17 W, 220/240 VAC, 50/60 Hz, 013 / 0.11 A, 2300/3000 rpm 42 - 47 dB noise level. el

**19" equipment racks:** The Win-box series Wall-Mounted Cabinets come with automatic U-numbered device mountings, resulting in a 1U spacing with the same U height selection from top to bottom or bottom to top. These device mountings have 4-fold bending surfaces and provide high load capacities with a thickness of 1.5mm. The 19" device mountings are made of steel with 8-12 microns of zinc coating, making them corrosion-resistant. They are also deeply adjustable

# WIN-BOX

## WIN-BOX 19'' WALL TYPE CABINET

Additional features: All cabinet Wall mounted cabinets are suitable for wheel or height adjustable pinion foot assembly integration. This feature; It allows the use of cabinets as free standing cabinets, especially in narrow and low height locations. Likewise, with the integration of wheels or height-adjustable legs, you can put the product in under-the-table format.

**Side panel:** Side panels can be locked and removed with cylindrical style locking system, easy mechanical locking to main frame snap-on with multi-twist structure, snapping system, easy insertion and removal of panels in seconds.

**Back panel:** Win-box series cabinets are mechanically screwed back panel to the main body. The rear panel is also used as a wall marking and screwing template. Thanks to this feature, it can be mounted on the wall with much less personnel in heavy-duty cabinet field applications. Thus, it becomes possible to perform the work with a single technician. First, the rear panel is placed on the wall and marked, then holes are drilled in the wall, and finally the rear panel is mounted on the wall. Afterwards, the wall-mounted cabinet is hung on the back panel. For safety reasons, the cabinet is attached to the rear panel separately with the help of screws. All our wall mounted models have this feature.

**Modular:** Win-box wall-mounted cabinets are shipped assembled as standard. With the optional demounted (FLATPACK) package option, an advantage of up to 60% is provided in transportation cost and storage area.

### 19" DOUBLE SECTION FOR WALL MOUNTING CABINET

Additional body: Win-box series cabinets, withd=150mm additional body module, are applied when there is a need for 4-way access to the cabinet in wall mounting applications. Completely standard and stocked product portfolio is shipped pre- assembled.

Additional body module: d=150mm designed for Win-box and Win-E series cabinets, it is applied when there is a need for 4-way access to the cabinet in wall mounting applications. Completely standard and stocked product is shipped as pre-assembled. There is a 19" device mounting area inside the Additional Compartment. Passive, low depth products can be

mounted. The additional compartment chamber, which offers a usable internal depth of 100mm, is used to accommodate cable bundles.

Additional body is applied to d= 450mm and d=560mm cabinets as (450+150mm) or (560+150mm) applied to Standard Wall Mounted Cabinets. With the help of the hanging holes on the additional unit, it is mounted on the wall and the cabinet body is opened with the help of the hinged structure, allowing easy access. It also provides ease of intervention and maintenance to the devices from behind.Thanks to its heavy-duty hinges, the cabinet can be opened and locked up to 120 degrees. Thanks to the plastic closure and brushed cable entry on the additional unit at the top and bottom, it allows the cables to be organized into the additional compartment while wiring.

# FLOOR SHEET PANEL

## IP65 | FLOOR SHEET PANEL

#### TECHNICIAL SPECIFICATIONS

Degree of Protection:IP65 Material: 1.2mm DKP Sheet Color:RAL 7035 Width:200-300-400-500-600-800 Height:300-400-500-600-700-800-1000-1200 Depth: 250-300-350-400-500-600 Optional special dimensioning is made. Standard Configuration: Body-1 piece Front cover - 1 pc Lock-1pc Lid hinge-1 pc Base plate-1 piece Mounting kit-1 pc Bottom cable closure - 1 piece

 They are suitable designs for wall, floor or pole mounting. Solid welded metal body for high strength.
 Full compatibility with edge bends and head gasket.
 More space for interior mounting with narrow side bends.
 The floor sheet can be easily taken into or out of the panel.
 Provides IP65 protectio and water (IEC EN60529)
 Provides IK10 resistance against external impacts (IEC EN62262)
 Henkel Bonderite Nanotechnology based on Nano-Zirconium, suitable for 600 hours salt test resistance coated with RAL 7035 fine grainy color, 70-90 micron thick

- IP65 Wall Mounted Panels with Base Sheet: Industry / Automation / Electrical Panels are used in indoor and outdoor applications for electrical distribution, automation, command control purposes
- Cover reinforced with multi-layered twists for high strength.
  - There are single/double locks on the cover and the opening direction of the cover can be changed. Zamak hinges have high corrosion resistance. Polyurethane cast gasket for sealing on the lid. Mesan brand high guality locks.
  - Vertical mounting strips on the cover that allow mounting at every 25 mm.
  - Cable entry protected by a sealed cover at the bottom Sturdy mounting brackets.

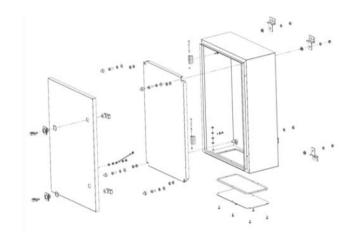

- The main body is formed by welding the lower and upper parts with the twisted center piece. Multi-twisted body and welding provide extra strength against load bearing and external impacts.
- The structure of the cover is reinforced in terms of rigidity and flatness with multiple twists and folds. Better sealing protection ensures proper contact with the gasket.
- Base plate (Mounting plate) manufactured from galvanized sheet.
- Cable entry closure panel prevents dust & water entry room the cable entry section. Wall mounting brackets, high without deformation provides transportation against loads of large quantities

# DVR-CABINET

# WALL MOUNTED DVR CABINET

#### **GENERAL FEATURES:**

Welded monoblock body – 1.50mm Vertical opening door with one point locking, 27° and 90° steps. There are also 2 lock options with different passwords.

Ventilation holes for passive cooling inside the box In-lid mounting capability for 19" DVR device Adjustable fixing plates for device mounting. Rubber fixing gaskets that prevent damage to the

device by applying pressure on the device during the opening and closing of the cover.

Movable mounting plate for 12" display mounting on rear wall

variation by model

5 different cable entry points on the body: top, bottom, left, right and rear wall.

1U mounting bracket for mounting 10" Socket module in the upper part of the body.

Robust and fine-textured Electrostatic Powder Paint application 90 micron.

Maximum loading capacity : 50 kg

#### **Wall Mounted DVR Cabinet**

Wall Mounted 19" DVR Cabinets provide space saving and aesthetic appearance thanks to their vertical mounting. It provides perfect compatibility and ease of use for Network, Security, DVR, Audio and Cabling Systems applications. Suitable for mounting all DVR devices.

## **IP PANELS**

### IP54-IP55-IP66 PANELS

## IP 54 INDOOR BOARD

**IP54** wall mounted field enclosures: the indoor cabinet is designed for industrial applications. It prevents dust and water ingress in IP54 protection class.

It provides IP54 class protection when you are equipped with a fan and filter. Application areas are semi-open areas such as factories, warehouses and porches that are not exposed to rain and environmental factors.

Fully sealed doors, IP54 class zamak lock, 2-point locking system and insulated cable entries offer the best performance in water and dust protection.

The highest corrosion resistance is provided with RAL 7035 light gray epoxy polyester electrostatic powder paint applied on the monoblock welded structure made of 1.5mm sheet metal.

The product offers passive ventilation with filtered air inlet and outlet as standard.

When desired, the system can be converted to fan cooling by integrating the fan.

There is a metal ventilated cover on the top cover of IP54 cabinets to protect it from splashing water.

#### **TECHNICIAL SPECIFICATIONS**

Material: Steel sheet - monoblock welded structure Width: 600 mm

**Height:** 7U, 9U, 12U, 16U,20U, (490mm, 580mm, 710mm, 890mm,1065mm)

Depth: 450, 600 mm

600 hours salt spray test resistance with epoxy polyester electrostatic powder paint

**Color:** RAL 7035 light gray 2-point locking system with Zamak handle

Integrated fan filter housing

Top cover providing IP54 protection and allowing fan mounting

IP54 compliant cable entry points (2xPG21, 1xPG48) **1 set:** 2 sewing devices positioned at the front **Loading Capacity:** 500 K G

## IP 55 INDOOR BOARD

**IP55** wall mounted field boards are designed for indoor and outdoor cabinet industrial applications as wall, floor and pole type.

It prevents dust and water ingress in IP55 protection class according to EN60529 standard. When equipped with wall-mounted IP55 fan and filter, it provides IP54 class protection.

Application areas are semi-open areas such as factories, warehouses and porches that are not exposed to direct rain and environmental factors.

Fully sealed doors, IP55 class zamak standard 2-point and optional 3-point locking system and insulated cable entries offer the best performance in water and dust protection.

The highest corrosion resistance is provided with RAL 7035 light gray epoxy polyester electrostatic powder paint applied on the monoblock welded structure made of 1.5mm sheet metal.

The product offers passive ventilation with filtered air inlet and outlet as standard. When desired, the system can be converted to fan cooling by integrating the fan. It is secured with a graduated cap on the fan closure in the outdoor cabinets against all kinds of adverse weather conditions.

**TECHNICIAL SPECIFICATIONS**

## **SECURITY CAMERA CABINET**

## SECURITY | CAMERA CABINET

SEMY-Security (Urban Security Management System) cabinets protect your valuable and sensitive equipment with the developed pole type Mobese designs It is resistant to rain, snow, wind, sunlight and earthquake. Thanks to its high resistance to corrosion, it provides effective protection against environmental effects for your technological investments. Armor or insulation material is used on the wall

Due to environmental and regional conditions, using a double - walled and insulated structure in the panels is an effective solution against the heat problem of the panel. Through the filtered grids on the body,

it allows the cold clean air from the outside to enter the panel and to reduce the internal temperature of the panel with natural diffusuin. Ciirculation fans are fans that discharge the air inside the panel. It lowers the temperature and prevents heat condensation that can damage active devices.

### **Technicial Specifications**

Outer wall (1.5mm, DX51D+Zn275 galvanized steel material) and inner wall (1.0mm DX51D+Zn275 galvanized steel material) External surface: nano technology, high corrosion resistant polyester external type electrostatic powder paint. Internal surface: galvanized steel material Radius oval or 90° corner and cap structure Filter and ventilation system Easy post mounting with 2 alternatives: Heavy duty - Economic clamp type 4 camera mounting areas 4 x W automat (DIN) rails Movable UPS rack and modem-device-switch rack Auto LED lighting module (supplied as accessory) Color: RAL7035 light gray WK2 standard antivandal 3-point locking lever lock and gasketed front cover with lock system Door switch (supplied as accessory) Cable management hooks (supplied as accessories)

## KGYS CITY SECURITY CABINET CITY SECURITY MANAGEMENT SYSTEM

KGYS; in order to ensur public order, to eliminate threats to internal security and to carry out the audit task more effectively; It is a modularly developed information system that enables the transmission of meaningful results by processing the images obtained in accordance with the legislation and the support of the results with polynet applications. Visual information obtaines simultaneously; These are the structures that preserve the equipment that enables them to be stored and monitored as evidence, and to make the necessary records and actions about the alarms abtained automatically or as a result of monitoring. It is a design in accordance with KGYS specification.

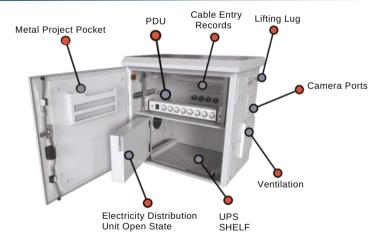

#### **KGYS Electicity Distribution Unit**

It is a product that has been specially designed for switchgear materials and provides ease of assembly with its hinged structure. The electrical distribution unit can be completely disassembled and electrical connections can be made outside and integrated into the panel later.

# SIGNALIZATION BOARD

Signalization Board: Designed for intersection control systems.

It provides IP55 sealing class and is under protection against water and dust.

Three point locking system.

Stopper mechanism on the outer door for ease of working in windy weather.

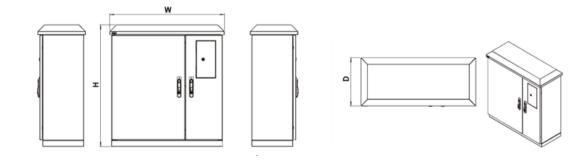

Concealed hinge system is protected against Vandalism.

The wide cover of the double-door wide panel type panel positions the electrical and electronic devices of the system. The narrow cover part is designed for electricity and electricity meter.

### Technical data

Material: Steel sheet Width: 650mm Height:950mm Depth: 400mm Color:RAL 7035 light gray Lock: three points against vandalism metal front cover) Screwed rear floor plate Robust design Extra space efficiency 1 fan module Front device mounting strut Disassembled option available Various features that make installation easy Maximum Static Load up to 80 kg.

## **OPEN SYSTEM CABINET**

## **OPEN SYSTEM** OPEN SYSTEM CABINET

Open System Roofs: designed to be used where easy access to devices and system is required. It is suitable for use in clean, safe, air-conditioned environments. It can be used in network solutions as well as as a server cabinet.

It has a safe, solid steel construction structure, 6 twisted solid carrier profile structure, easy cabling, high quality production, modular structure, economic transportation and ease of shipment.

Open System Roofs are suitable for wearing top hats when desired. Optionally, it is shipped as assembled or demounted.

### GENERAL FEATURES

300 kg load carrying capacity

Wide measuring range; 16U/22U/26U/36U/42U/47U Width; 536mm.

Single roof for 19" front mounting

Depth for single roofs 80mm-160mm

Standard colors; RAL 9005 Black & RAL 7035 Light Gray Corner profiles are suitable for the use of standard accessory cable loops.

It has pinion feet as standard.

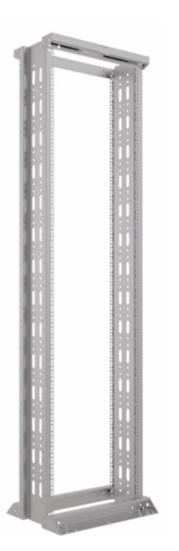

Provides easy and fast access to equipment. modular

## F-CENTER STANDING TYPE FIBER OPTIC CABINET

#### **F-CENTER: Fiber Optic Distribution Features**

**Fiber Optic** Distribution Frame conforms to standard 19 and ETSI installations.

**Fiber ODF** is designed to be used with High density side access type modules.

2016 port maximum fiber capacity (splice & patch) and superior cable management.

**F-CENTER** Optical distribution roof has special cable glands to fix themaximum number of cable bundles. Special miniflex tubes or feeding modules.

**F-CENTER** Optical distribution frame provides maximum protection against crushing and straining for fiber cables.

Wide variety of splice, patch and cable storage options Critical bend radius protection of 35mm across all roof and fiber modules Maximum cable protection Interchangeable additional cassettes for various cable counts and adapter types. **F-CENTER:** WDM and splitter can be attached to the optical distribution frame. Integrated patchcord management and storage.

#### **Capacity Information:**

14 x 3U Modules on 47U roof LC, SC, FC, ST, MTRJ, E-2000 adapter types The ODF optical distribution frame complies with Telcordia Specification GR-449.

F-CENTER: Indoor Fiber Distribution Cabinets have an extremely robust and strong structure that allows them to be used in all applications. ODF offers cost-effective and assembly-friendly solutions for a multitude of applications in the fiber field. It is configurable to end-user requirements and offers unique features to benefit system designers, installers and network administrators. The fully assembled standard cabinet can be delivered with or without a side cover. The F-CENTER optical distribution frame offers the highest possible capacity and superior cabling with flexible cabling access, an expandable roof concept, integrated cable management and future-proof modular expansion. The high density side access type modul is also designed to suit various types of fiber termination, splice, patching and storage applications.

#### **F-CENTER Application Areas:**

Fiber transmission networks, Telecom backbone infrastructure, FTTX and GPON applications, High-capacity data centers, fiber infrastructures of government institutions.

Product Code	Product Description W=900 D=300 mm	Dimensions (W*H*D)	Product Kg
SM.ODF12U90.C0	12U Free Standing ODF Cabinet W=900mm D=300mm	900x720x300 mm	34 kg
SM.ODF26U90.C0	26U Free Standing ODF Cabinet W=900mm D=300mm	900x1345x300 mm	58 kg
SM.ODF42U90.C0	42U Free Standing ODF Cabinet W=900mm D=300mm	900x2055x300 mm	88 kg
SM.ODF47U90.C0	47U Free Standing ODF Cabinet W=900mm D=300mm	900x2230x300 mm	100 kg
